

Python Practice: If, Else, and Elif Questions

1. Write a program to check if a number is positive or negative.
2. Write a Python program to check whether a number is even or odd using if-else.
3. Write a program to input a person's age and print 'Minor' if less than 18, 'Adult' if between 18 and 60, and 'Senior' if 60 or above.
4. Write a program that checks if a character entered is a vowel or a consonant.
5. Write a Python program to check if a number is divisible by 3 and 5 both.
6. Write a Python program to input marks of a student and print the grade: - 90-100 → A - 80-89 → B - 70-79 → C - 60-69 → D - <60 → F
7. Write a program that takes input for two numbers and prints which one is greater or if they are equal.
8. Write a program that checks whether a year is a leap year or not.
9. Write a Python program that simulates a simple login system with a stored username and password. Use if-else to check credentials.
10. Write a calculator program that takes two numbers and an operator (+, -, *, /) from the user and performs the operation using if-elif-else.
