

JavaScript Variable-Based Problem-Solving Questions (Basic to Advanced)

BASIC LEVEL (10 Questions)

1. Simple Interest: $SI = (P * R * T) / 100$
2. Area of Rectangle: $A = \text{length} * \text{breadth}$
3. Perimeter of Rectangle: $2 * (\text{length} + \text{breadth})$
4. Swap Two Variables using a third variable
5. Convert Celsius to Fahrenheit: $F = (C * 9/5) + 32$
6. Calculate Square and Cube of a Number
7. Calculate Total and Average of 3 Marks
8. Convert Minutes to Seconds
9. Calculate GST Amount: $\text{price} + 18\%$
10. Area of Circle: $\pi * r * r$

INTERMEDIATE LEVEL (10 Questions)

11. Compound Interest: $A = P (1 + r/100)^t$
12. BMI Calculator: $\text{weight} / (\text{height} * \text{height})$
13. Total Salary = Basic + HRA(20%) + DA(40%)
14. Calculate Discount on a Product
15. Fahrenheit to Celsius: $C = (F - 32) * 5/9$
16. Electricity Bill Calculator (slab wise)
17. Calculate Speed = distance / time
18. Grading System based on average marks
19. Convert Days to Years, Months, Days
20. SI with different rates for each year

ADVANCED LEVEL (10 Questions)

21. EMI Calculator
22. Profit & Loss % Calculator
23. Distance Between Two Points
24. Loan Eligibility Checker
25. Percentage Calculator for 5 Subjects

26. Volume of Cylinder: $\pi * r^2 * h$

27. Currency Converter (INR to USD/EUR)

28. GST Split: CGST + SGST

29. CAGR: $(\text{End}/\text{Start})^{(1/n)} - 1$

30. Working Hours Salary with Overtime
